CONGRATULATING SOUTH TEXAS
INDEPENDENT SCHOOL DISTRICT
ON HAVING THREE SCHOOLS
LISTED IN THE TOP 100 AMERICAN
HIGH SCHOOLS IN U.S.
NEWS AND WORLD REPORT

HON. RUBÉN HINOJOSA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 12, 2007

Mr. HINOJOSA. Madam Speaker, I urge my colleagues to join me in congratulating the South Texas Independent School District for having 3 of its high schools listed among the 100 in the nation according to U.S. News and World Report.

The South Texas Independent School District shatters the myth that low income and minority students cannot achieve academic excellence. Eighty percent of the school district's students are of Hispanic heritage. Over 50

percent are eligible for free or reduced priced lunches. These outstanding high schools are open enrollment—they do not pick and choose among the best and brightest, rather they foster excellence in any student willing to make the commitment to a rigorous program of study.

Of the more than 18,000 public schools in the United States, the South Texas Independent School District placed 3 high schools: The Science Academy, the Business Education and Technology Academy, and the High School for Health Professions in the gold medal category for excellence in school performance on state tests and for success in providing college level coursework to all of their students. They demonstrate that high achievement is possible system-wide when you bring together the right leadership and community support.

I would like to commend the superintendent of South Texas Independent School, Dr. Marla Guerra and the president of the school board, Mr. Ernesto Alvarado for their leadership and stewardship of the school system. They have maintained and deepened the tradition of high achievement that has been the hallmark of the school district since the first magnet high school opened its doors in 1984.

I ask my colleagues to join me in congratulating the achievement of the Science Academy, led by Principal Michael Aranda and ranked number 23 in the nation.

Please join me in celebrating the national recognition of the Business Education and Technology Academy led by Principal Magdalena Gutierrez and ranked number 54 in the nation.

Let us cheer the accomplishment of the High School for Health Professions, led by Principal Barbara Heater and ranked number 64 in the nation.

The national recognition of the talent and potential of our young people in South Texas is long overdue. I commend South Texas Independent School District for nurturing tomorrow's leaders. I applaud our community of students, parents, and educators for demanding the best and exceeding expectations.

In closing I would like to share with you the secret of South Texas Independent School district's astounding success. They set high standards for academic and personal development and shared values. Their goal is that each graduate of South Texas Independent School district: is a compassionate, caring individual; has a passion for life-long learning; is an effective communicator; is a producer of quality work; is creative and curious; appreciates the differences in people; is a competent problem-solver; is a responsible and ethical citizen; strives for a balanced professional and home life; contributes to the community well-being through service; and is academically and occupationally skilled.

The Science Academy, the Business Education and Technology Academy, and the Health Professions High School in the South Texas Independent School District are among the best of the best high schools in the nation. They produce graduates who are ready, willing, and able to contribute to their communities. I congratulate them on winning national recognition and encourage them to keep up the good work.

Mr. PORTER. Madam Speaker, I rise today to honor my good friend, Judge Cheryl B. Moss, who is being honored as a Bench Trailblazer by the Bicolanos of Nevada and Filipino American California Expatriates Society of Las Vegas.

TRIBUTE TO RESEARCHER AND
UNM VICE PRESIDENT TERRY
YATES

HON. TOM UDALL

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 12, 2007

Mr. UDALL of New Mexico. Madam Speaker, when Terry Yates began hunting the "Sin Nombre" virus, it was a vague and threatening disease that public health professionals could neither understand nor control. Yates and his collaborators traced the virus to its sources, revealed how it works, and saved lives. Because of his resolve to demystify the deadly illness, today we know how to prevent and treat what is now commonly known as hantavirus.

Yates's accomplishment won him awards, but for him it was just the job he wanted to do. From his perch at the University of New Mexico, he devoted his remarkable intellect and

passion to saving lives and helping students live their dreams.

He loved the thrill of intellectual pursuit. Colleagues noticed that he preferred being out in the field, in hot pursuit of a new discovery. Back on campus, he helped build UNM and connect the university to its community, and he helped a new generation of scientists to get into the field.

As we honor his life and contributions today, our thoughts are with Terry's wife Patsy and their sons. He will be missed by the UNM community and all of us who benefited from his intellect and commitment to helping others.
